## PROJECTS

---

### Blood Donation App: (Client project for Red Cross Society)

- As a Native Android Developer, I created a Blood Donation App for Red Cross Society.
- Used technology like Kotlin, Jetpack Compose, Retrofit, Dagger Hilt, Timber, Firebase.
- Created fully custom UI/UX according to the organization's views. Features like global announcements, blood requests etc.

### NewsApp- A news reader app

- As a Native Android Developer, I created a news reader app which fetches news from an API and displays it.
- Functionality: Displaying list of news along with time, searching for articles, bookmarking articles for future reading.
- Technologies used: Kotlin, Jetpack Compose, Retrofit, Dagger Hilt, ROOM Database

### PokeDex App

- As an Native Android Developer, I created a fun PokeDex app which shows information about Pokemons.
- Used technology like Kotlin, Jetpack Compose, Retrofit, Dagger Hilt, Timber.
- Focused on the UI and the smoothness of the app, and used Material Dynamic Theming, has animations.
